

Semester-wise Details

*This registration is subject to approval(s) from faculty advisor/Course Instructor/Academic office.

Year/Semester: 2024-25/Autumn

Course Code	Course Name	Credits	Tag	Grade	Credit/Audit
CS 601	Algorithms and Complexity	6.0	Department elective	Not allotted	C

Year/Semester: 2024-25/Project

Course Code	Course Name	Credits	Tag	Grade	Credit/Audit
CS 797	I Stage Project	50.0	Core course	Not allotted	C

Year/Semester: 2023-24/Spring

Course Code	Course Name	Credits	Tag	Grade	Credit/Audit
CS 691	R & D Project	6.0	Department elective	AB	C
CS 694	Seminar	4.0	Core course	BB	C
CS 695	Topics in Virtualization and Cloud Computing	6.0	Department elective	BC	C
CS 745	Principles of Data and System Security	6.0	Department elective	BB	C
CS 899	Communication Skills	6.0	Core course	PP	N

Year/Semester: 2023-24/Autumn

Course Code	Course Name	Credits	Tag	Grade	Credit/Audit
CS 601	Algorithms and Complexity	6.0	Department elective	W	C
CS 699	Software Lab.	8.0	Core course	AB	C
CS 725	Foundations of Machine Learning	6.0	Department elective	BC	C
CS 744	Design and Engineering of Computing Systems	6.0	Department elective	BB	C
CS 770	Process Engineering	6.0	Department elective	BB	C
GC 101	Gender in the workplace	0.0	Core course	PP	N
TA 101	Teaching Assistant Skill Enhancement & Training (TASET)	0.0	Core course	PP	N

Academic Bridge - A Mentorship Platform for Research Collaboration

CS 699 Software Lab

1. Project Overview

The **Academic Bridge** platform is a dynamic mentorship solution designed to foster academic exchange and research collaboration between mentors and mentees. Built using Django for the web framework and PostgreSQL for the database management, the platform enables mentors to showcase their research expertise, manage projects, and effectively engage with mentees. The platform is tailored to enhance targeted mentorship by connecting mentees with mentors who align with their specific research interests.

2. Key Features

2.1 User Registration and Profile Management

- **Mentee and Mentor Registration:** Both mentees and mentors can sign up and create detailed profiles. Mentors can highlight their research areas, past projects, and current initiatives, while mentees can express their academic interests and research goals.

2.2 Search and Matchmaking

- **Mentee Search Functionality:** The platform offers robust search capabilities allowing mentees to find mentors based on specific research interests, fields of study, or ongoing projects. This targeted search ensures that mentees connect with mentors who can offer the most relevant guidance.

2.3 Mentorship Workflow Management

- **Request and Acceptance Workflow:** Mentees can request mentorship from selected mentors based on their research interests. Mentors receive these requests and have the ability to accept, decline, or engage in preliminary discussions with the mentees.

2.4 Meeting Scheduling

- **Meeting Coordination:** Mentors and mentees can organize and schedule meetings directly through the platform, ensuring streamlined communication and consistent interaction. The scheduling system supports reminders and notifications for upcoming meetings.

2.5 Task Allocation and Management

- **Task Assignment and Tracking:** Mentors can assign tasks to mentees, monitor progress, and mark tasks as either completed or canceled. This feature is essential for tracking milestones and ensuring that research objectives are met in a timely manner.

3. Platform Architecture and Technology Stack

The platform leverages the following technologies:

- **Backend:** Django, with a modular architecture that separates the user management, matchmaking, and task allocation functionalities.
- **Database:** PostgreSQL, used for handling relational data, including user profiles, task management records, and meeting schedules.
- **Frontend:** HTML, CSS, and JavaScript to create an intuitive user interface that facilitates easy navigation and interaction.

4. Project Impact

By engineering the **Academic Bridge** platform, this project offers a solution that bridges the gap between aspiring researchers and experienced mentors. The streamlined workflow, from matching mentees with mentors to managing collaborative tasks, enhances the overall academic experience and fosters meaningful research collaborations.

The platform serves as a scalable model that can be extended to different academic institutions, research groups, or even large-scale collaborative projects, making it a significant contribution to the academic community.

6. Conclusion

The **Academic Bridge** mentorship platform stands out as a powerful tool that enhances academic engagement and accelerates research development through strategic and effective mentorship. By seamlessly integrating search, matchmaking, task management, and scheduling features, it delivers a comprehensive solution for academic collaboration in the digital age.
